Pathways to Improved Resilience

Determining how we decide where to invest our limited resources to most effectively improve Aotearoa New Zealand’s resilience to earthquakes.

Understanding the factors...

...that influence the development of strong communities.

PLANNING + POLICY

COLLABORATION

with Wellington Region Emergency Management Office (WREMO) developed five three-hour workshops on post-disaster recovery in 2018.

BRINGING TOGETHER MEMBERS OF

disaster management organisations, academia, mana whenua, community members, and members of local and central government in a full day of learnings and activities.

AIM 1

Establish pathways to recover from an earthquake in Wellington more effectively.

AIM 2

Strengthen links between national and local community-based planning efforts.

OUTCOMES

a better informed emergency management strategy for the region and a more engaged community.

MĀTAURANGA MĀORI

Connecting Māori communities from kura to kaumatua and local authorities to enhance earthquake resilience.

COLLABORATIVE COMMUNITY BASED PROGRAMMES

National earthquake drill and tsunami hīkoi, held once a year with

516,124 + participants

currently registered nationwide. Research has underpinned the efficacy of ShakeOut and updated to include a Tsunami Hīkoi developed by East Coast LAB.

TE HīKOI A RūAUMOKO RūAUMOKO’S WALK

Māori bilingual pukapuka (picture book) based on Ngāti Kahungunu stories and kupu (words) telling the story of what to do in an earthquake and subsequent tsunami threat.

Collaborative partnerships include Ngāti Kahungunu Iwi Incorporated, Joint Centre for Disaster Research, East Coast Lab, Eastern Institute of Technology (EIT) ‘Te Uranga Waka Māori Studies’, Te Puni Kōkiri, Ministry of Education, Hawke’s Bay CDEM, Te Kowanga Reo National Trust Board and Flip Design.

Connecting Māori communities from kura to kaumatua and local authorities to enhance earthquake resilience.

40% of researchers involved in this flagship identify as wāhine (women)

100% of Māori researchers involved in this flagship identify as Māori

Collaborative partnerships include Ngāti Kahungunu Iwi Incorporated, Joint Centre for Disaster Research, East Coast Lab, Eastern Institute of Technology (EIT) ‘Te Uranga Waka Māori Studies’, Te Puni Kōkiri, Ministry of Education, Hawke’s Bay CDEM, Te Kowanga Reo National Trust Board and Flip Design.

...is the key to sharing new knowledge and acknowledging the multiple pathways to...

MULTIPLE PATHWAYS TO EARTHQUAKE RESILIENCE

This emphasizes mana whenua + community voices as well as collaborations with research, industry + government stakeholders.

He aha te mea nui o te ao. He tāngata, he tāngata, he tāngata.

What is the most important thing in the world? It is people, it is people, it is people.
